

ELWOOD H-SERIES SERVO MOTORS

AUTHORIZED REPLACEMENTS FOR ROCKWELL AUTOMATION H, S, W, & 1326AS SERIES

LIFETIME SUPPORT PROGRAM

In the Spring of 2009 Elwood released the only true drop-in replacement for Rockwell Automation/Allen-Bradley's H, S, W, and 1326AS series servo motors. In addition, Elwood's H-Series also directly replaces HSM (H-Series Servo Motors) from Giddings and Lewis (G&L) Automation Control.

As an Encompass Partner, Elwood's H-Series is authorized by Rockwell Automation. Elwood builds to original specifications using OEM components so that the motors drop-in without changes to motor data files, machine setups, tuning, cables, or mechanical components.

For *OEMs, machine builders, and end-users with a large installed base* Elwood offers its **LIFETIME SUPPORT PROGRAM**. For agreed upon model numbers, Elwood will maintain a working inventory of new and rebuilt motors to support the customer's on-going replacement needs.

ELWOOD'S LIFETIME SUPPORT PROGRAM OUTLINE

- Working inventory of the customer's selected models for reduced lead-time
- Indefinite support
- OEM components, original factory specifications
- Improved productivity
- Full warranty
- Fair prices

ELWOOD'S LIFETIME SUPPORT PROGRAM DETAILS

- Working inventory of the customer's selected models for reduced lead-time
Elwood will maintain a working inventory of new motors, rebuilt replacement motors, and components in the selected models to reduce turn-around to five business days or less. If Elwood determines that a motor in the **LIFETIME SUPPORT PROGRAM** cannot be rebuilt, it is replaced with a new motor at the same program price.
- Indefinite support
Elwood makes no plans to obsolete or retire motors in the lifetime support program. Elwood wants to help customers maintain productivity of proven machinery.
- OEM components, original factory specifications
Starting with original engineering documentation, Elwood uses only original equipment components and original manufacturing techniques for building new and rebuilding H-Series motors. Whether it is a new motor or a rebuild, each motor is tested to original factory specifications.
- Improved productivity
Because Elwood only uses OEM components and manufacturing, customers can have confidence that machines equipped with Elwood's H-Series motors will be more productive and see less down time than with replacements/rebuilds that don't utilize OEM components or manufacturing.
- Full warranty
All motors in the **LIFETIME SUPPORT PROGRAM** receive the same warranty. Whether new or rebuilt, Elwood stands behind its motors with the same one-year warranty. For additional details refer to www.elwood.com/terms_conditions.html
- Fair Prices
Typical **LIFETIME SUPPORT PROGRAM** pricing is 60% of new motor pricing. The price list is always available at: www.elwood.com/dHSeriesPricing.pdf
