

Elwood High Performance Motors, H-Series Success Story: *Lifetime Support*

A Fayetteville, Arkansas company designs and manufactures machinery and control systems for a range of applications. They used several models of H-Series servo motors (H-4050-P-H00AA and H-4075-R-H00AA) from Rockwell Automation in motion control systems for packaging machinery.

The H-4075-R-H00AA motors are used in current machinery. H-4050-P-H00AA were used in the previous generation. With the end-of-life of Rockwell Automation's H-Series, They were forced to find a drop-in replacement as a repair part to support their customers and all their control systems in the field.

Elwood's H-Series offers several benefits that cannot be found in motors from any other manufacture. Because they utilize OEM components, Elwood's H-Series motors bolt in-place without any mechanical changes. End-users see the same performance from replacement parts as with the original motors. Additionally, the motors are electrically the same as originals. No changes are required within the control system. Elwood's H-Series run on the original tuning and parameters. Electrically and mechanically identical to Rockwell Automation's motors, Elwood's H-Series are true drop-in replacements.

Finally, Elwood maintains their motors indefinitely. As long as their Machinery has requirements, Elwood will support H-Series motors. Elwood's support includes not only new motors, but also rebuilds that return motors to as-new specifications and feature a one-year warranty. With Elwood's H-Series, the Fayetteville company and their customers will have proper repair parts as long as they have machinery.

Elwood Supports its Products Indefinitely. (Below is a partial listing of H-Series servo motors available. If you don't see your model, contact Elwood for additional availability.)
